DETAILED ACTION

This office action is in response to the amendment filed October 26, 2005. In accordance with the amendment, claims 2-5, 7-13, 15-21, and 23-28 have been amended; while claims 1 and 14 (original independent claims) have been canceled.

The amendments to the specification have been acknowledged.

Allowable Subject Matter

1. Claims 2-13 and 15-28 are allowed. The following is an examiner's statement of reasons for allowance: the relevant prior art of record does not teach or reasonably suggest that the optical device has a *transparent substrate*, in which emitted light passes through the substrate, and which the transparent substrate reflects a part and transmits a part of the optical signal. The relevant prior art of record does not teach or reasonably suggest, along with a transparent substrate, that a dielectric multilayer film is included (see also new versions of claims 9 and 24- now in independent format). The closest prior art of record (Miyasaka et al. U.S.P. No. 5,867,622) does not teach or reasonably suggest in combination with other relevant prior art, the *combination* in which a transparent substrate is used, further with the originally claimed limitations, in which the transparent substrate reflects a part and transmits a part of the optical signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
